

BABACO®

DROP BOX SAFE

Babaco's Drop Box Safe is designed for protection against robbery as well as internal theft, allowing quick deposits and secure storage for cash and miscellaneous valuables without actual access inside the safe. The Safe has a unique access port to make deposits. The compact design enables installation in tight areas. The unit protects money collections where immediate deposits are required. The Babaco Drop Box Safe is made of heavy gage steel and secured with Babaco's restricted key way dual lock that offers protection against theft and unauthorized opening unless both independent keys are used together. The thick diameter of 1/4" steel hinge and steel locking bolts provide added security making it difficult for any thief to engage in any attempts at prying it open.

Contact Babaco today for more information about our Drop Box Safe.
