

BABACO®

Bulkhead LOK

The Bulkhead LOK is unique high security solution specifically engineered for vehicles that have a Sliding door to the cargo area from the cab such that of step van delivery vehicle. The lock automatically locks and secures the cargo area every time the door is closed. The Bulkhead LOK is made of high strength casting securely installed inside the cargo compartment to protect against unauthorized access. The high security restricted keyway cylinder is designed so that it can be keyed in any combination to fit your needs with unique codes, keys of the same code or even a master key.

To operate the bulkhead door insert the high security key into the lock once turned the door will release and allow the driver to access the cargo area. To secure the cargo area simply close the bulkhead door and the lock will automatically engage to secure the cargo area. In the event that you are in the cargo area and the door closes there is a quick release button that allows the lock to opened from the inside the cargo area.
